## PROJECTS

### Dreamland Estate Website (HTML, JavaScript, CSS, PHP, SQL):

*Faux realtor website to facilitate buying and selling houses.*

[GitHub](#) | [Demo](#)

- Created a user authenticated faux realtor website to facilitate the selling and buying of homes between buyers, sellers, and the website admin.
- Used PostgreSQL to keep track of user information and inventory.

### Portfolio Site (JavaScript, HTML, Next.js, CSS, React, Tailwind):

*A deeper look at some of my work.*

[GitHub](#) | [Demo](#)

- Developed a responsive webapp to show some of my latest projects

### National Parks Webapp (Python, JavaScript, HTML, POSTGRESQL, Flask):

*A resource to find nearby National Parks with suitable weather conditions.*

[GitHub](#)

- Creatively sourced data by writing dynamic REST API routes that chained queries to National Parks API for park data, and Sunny Day API for weather conditions.

## EXPERIENCE

### Relevant Coursework:

- **Data Structures:** An overview of data structure concepts, sorting algorithms, and search algorithms.
- **Software Engineering:** Developed apps using Flask, PostgreSQL, and React to address potential business demands. Refactored and optimized based on weekly code reviews with Facebook Engineer in Residence.
- **Web Programming:** Developed a series of websites designed to explore fundamental languages and coding techniques of modern web development.

### Work Experience:

- **CarMax (Inventory Associate):** Conducted quality vehicle inspections and appraisals to assist customers with the buying and selling of their vehicle.
- **RaceTrac (Cashier):** Provided prompt, efficient, and courteous guest service.
- **Chick-fil-A (Cashier):** Completed sales transactions within establishment.

## EDUCATION

### Georgia State University

JUN 2016 - DEC 2022

Bachelor of Science:

Computer Science

Concentration: Computer  
Software Systems

## SKILLS

Front End: JavaScript, React,  
HTML5, CSS3, Next.js

Back End: Node, PostgreSQL,  
REST API, Python, Java, Flask

Tools: Agile, Heroku, Git,  
OAuth, TDD, CI/CD, Tailwind

## INTERESTS

Open Source. Music  
Production, Weightlifting,  
Nature/Wildlife, World Travel
